Profile Summary

Full Stack JavaScript Developer (MERN) with **2+ years** of experience building scalable web applications. Skilled in **React.js, Node.js, Express, MongoDB, SQL, Firebase**, and **RESTful APIs**. Experienced in **CI/CD, cloud deployment, and performance optimization**, delivering clean, maintainable, and high-performing code.

Professional Experience

Impegno Software Solutions Pvt. Ltd.

Nov 2023 – Apr 2025

Junior Full Stack Developer | Project: ABS-Fresh ERP System | Client: Dalival

- Developed ERP modules for Production, Sales, and Logistics using **React.js, Node.js, SQL, Redux**.
- Built responsive dashboards and optimized backend APIs, improving performance by 20–30%.
- Created **RESTful APIs** and implemented caching for improved scalability.
- Implemented **CI/CD pipelines with Azure DevOps and Docker**, ensuring smooth deployments.

IVIS International Pvt. Ltd.

Jan 2022 – Aug 2022

Software Engineer Trainee | Project: IVIS B2E Platform | Client: IVIS e-Services

- Developed B2B equipment request and approval modules using **React, Redux, Node.js, Express, MongoDB**.
- Improved backend responsiveness by 20% and created reusable UI components.
- Implemented **role-based access control** and **CI/CD pipelines** for consistent releases.

Technical Skills

Client-Side: React.js, Redux, jQuery, HTML5, CSS3, Bootstrap, Material UI, Tailwind
Server-Side: Node.js, Express.js, RESTful APIs, SQL, MongoDB, Firebase(Firestore, Auth), JWT
Tools & Platforms: Postman, Swagger, Git, Agile Methodology
Deployment: Azure, Docker, Firebase, Netlify, CI/CD pipelines

Key Projects

Chef & Customer Food Delivery Platform – Live Demo

- Engineered and maintained a scalable food delivery platform using **React.js, Node.js, Express.js, and MongoDB**, supporting Customers, Chefs, and Delivery Partners with role-based functionalities.
- Designed and developed high-performance RESTful APIs for authentication, order processing, cart management, and real-time order tracking, ensuring secure and seamless user interactions.
- Optimized frontend and backend performance through reusable component architecture, efficient state management with Redux, and MongoDB query optimization, improving overall application responsiveness.
- Implemented production-ready deployment workflows using **Docker, GitHub Actions, and cloud hosting platforms**, enabling streamlined CI/CD processes and reliable application releases.

Job Portal Application – Live Demo

- Developed and maintained a scalable job portal platform using **React.js, Node.js, Express.js, and MongoDB**, enabling seamless interactions between Job Seekers, Recruiters, and Admins.
- Designed and implemented secure RESTful APIs for job posting, application management, authentication, resume uploads, and role-based access control to support end-to-end recruitment workflows.
- Built responsive and reusable frontend components with Redux state management, improving user experience across job search, profile management, and application tracking modules.
- Optimized backend services and database queries for faster job search results and efficient data handling, while managing deployment pipelines using **Docker and GitHub Actions**.

Personal Finance Tracker – Live Demo

- Developed a responsive personal budgeting app using **React.js, Firebase, Ant Design**.
- Added Google Sign-In authentication for secure user onboarding.
- Designed dashboards with charts and category-wise insights for spending analysis.
- Added CSV import/export and filters to improve data management and UX.

Education

B.Tech – Computer Science Engineering

Jawaharlal Nehru Technological University (2014 – 2020)

CGPA: 6.1/10

Achievements

Certifications: Microsoft Certified – Azure Fundamentals, Certified JavaScript Developer – Scalar Topics, SQL for Developers – Scalar Topics

Awards: Star of the Month – Junior Developer, Impegno Software Solutions; Spot Award – Best Developer, IVIS International Pvt Ltd
